PROFESSIONAL EXPERIENCE

STEPS, Tunisie — Web Developer
Juin 2023 - August 2023

–Designed and developed a responsive web dashboard dedicated to human resources, enabling efficient employee management. This platform facilitated the visualization and analysis of key data, thereby contributing to the enhancement of decision-making processes through relevant and easily accessible statistics.

Technologies : Angular, .Net, SQL

Collision, Tunis— *CEO & CTO*
January 2022 - February 2023

–Attracted significant investments by being among the top ten startups, owing to exceptional performance during a rigorous evaluation conducted by international investors. These results bolstered our credibility and enabled the consolidation of funds to support our growth ; event's link

–As Chief Technology Officer (CTO) and CEO, I led the design of our website by developing a strategic project plan. This plan was crucial in aligning the website with our business objectives, ensuring its relevance and effectiveness.

–I infused an artistic dimension at every level of our project, including our website, by overseeing the artistic direction. This approach enriched the user experience (UX/UI) of our digital offerings by integrating expertise in graphic design, thus adding aesthetic and functional value to our digital solutions.

IBM, Tunisie — *Intern apprentice in Computer Science*
January 2018 - February 2018

–Managed customer payments by organizing data using Microsoft Excel.

Graphiste en freelance
October 2017 - Present
